EDUCATION

American University of Sharjah — Sharjah, UAE Aug 2023 – May 2027
Bachelor of Science in Computer Science | Minor in Management Information Systems

Gulf Asian English School Sharjah — Sharjah, UAE May 2009 – May 2023
High School Diploma

EXPERIENCE

IT Student Employee — School of Business Administration, AUS Feb 2026 – Present
American University of Sharjah, Sharjah, UAE

- Provided technical support to faculty and staff for day-to-day IT issues
- Troubleshoot hardware, software, and classroom technology to maintain smooth operation
- Supported academic and administrative systems to ensure operational continuity

Digital and Business Applications Intern — TotalEnergies Marketing UAE LLC June 2026 – July 2026

- Designed and built a Product Management Power App (Microsoft Power Apps + Excel backend) to replace a manual, error-prone Excel process feeding the company's barcode label-printing system, supporting product creation, editing, duplication, search, filtering, and deletion
- Implemented data validation and integrity controls — ID uniqueness checks, numeric-input validation, mandatory-field checks, and character-length limits — and replaced hardcoded dropdowns with dynamic, Excel-driven data sources for easier maintenance
- Built Power Automate workflows for automated email notifications on record creation, modification, and duplication, including custom HTML-formatted notification templates showing before/after field values
- Implemented audit-tracking fields (Created By/At, Modified By/At) across all modules to ensure full traceability of record changes
- Designed and developed a centralized Admin Panel and User Access Management module, allowing administrators to create accounts and manage permissions without editing Excel directly
- Built a four-role permission model (Admin, Viewer, Editor, Contributor) and later redesigned it into granular, field-level permissions (Can Edit Products, Can Delete Products, Admin Panel Access) after identifying and fixing a role-based access security gap
- Designed an Access Restricted screen and an automated Power Automate access-request workflow to handle unregistered/unauthorized users
- Extended the application into a multi-database platform by adding a Brand database and a large-scale Ford dataset module, each with full CRUD, search/filter, and audit functionality, plus a Database Selection page for navigation
- Conducted extensive testing and debugging across data-binding, form-state (New/Edit/Duplicate modes), permission evaluation, validation, and workflow issues
- Researched and documented long-term deployment architecture — service-account ownership, On-Premises Data Gateway, and ODBC-based synchronization — for integrating the app with internal network file storage
- Led the end-of-internship handover by transferring ownership of the Power App, Power Automate flows, and Excel data source to a company-managed account to ensure post-internship continuity

IEEE CS Club — Media Team Member Aug 2024 – Dec 2024
American University of Sharjah, Sharjah, UAE

- Created social media posts and visual content for the club's Instagram account
- Managed the Instagram page including scheduling posts and maintaining audience engagement
- Collaborated with the media team to promote club events and activities

Social Studies Club — Member Sep 2019 – May 2022
Gulf Asian English School Sharjah, UAE

- Collaborated with club members to plan and set up a stall for the school carnival
- Coordinated activities and organized materials to ensure smooth event execution

Math Club — Member Sep 2019 – May 2022
Gulf Asian English School Sharjah, UAE

- Collaborated with members to plan and prepare the Math Club's carnival stall
- Organized activities and materials to support a successful event

PROJECTS

NOSH — Student Meal Planning & Budgeting App (Group)

Aug 2025 – Dec 2025

IEN 301 | American University of Sharjah — Market Research, User Interviews, Feasibility Analysis, Prototyping (Base44)

- Co-developed a startup concept addressing meal planning, budgeting, and food waste for UAE university students
- Conducted market research and semi-structured user interviews to validate a gap in existing food delivery apps
- Designed app features including an AI recipe generator, budget tracker, dietary filters, and local meal plan finder
- Produced a full opportunity analysis report covering competitor analysis, IP strategy, and a scalable revenue model
- ★ Shortlisted for AUS Dragons' Den Competition (Jan 2025) — pitched to a panel of judges; subsequently invited to join the Sheraa DOJO Pre-Incubation Program for high-potential startups

SupplyLink — Manufacturing Order Management System (Group)

Aug 2025 – Dec 2025

Java, Java Servlets, JDBC, MySQL, HTML, CSS

- Built a full-stack web application supporting customer and admin roles
- Implemented order placement, tracking, production workflow, supplier management, and reporting
- Applied DAO pattern, relational database design, and servlet-based MVC architecture

No-Show Appointment Prediction Using Classification Models

May 2024

Python, pandas, NumPy, scikit-learn

- Developed classification models to predict appointment no-shows from a dataset with 20% class imbalance
- Implemented and compared Decision Tree and K-Nearest Neighbors classifiers
- Performed data preprocessing, feature engineering, and analysis to identify key no-show factors

AI Search Project — Pathfinding Algorithms

Sep 2025

Python, Jupyter Notebook

- Implemented BFS, Greedy Best-First Search, and A* pathfinding algorithms
- Compared algorithm performance, efficiency, and solution optimality for route-finding problems

Library Management System

Dec 2022

Python, MySQL, MySQL Connector

- Developed a backend system to manage books, users, and transactions using relational database design
- Implemented full CRUD operations with Python–MySQL integration via MySQL Connector

RESEARCH

Web-Based Evaluation of Disability Centers in the UAE

May 2025

ENG 204 – Advanced Academic Writing | American University of Sharjah

- Conducted a comparative analysis of three UAE disability centers (ZHO, DAC, SAC) using web-based data and academic literature
- Examined services, staffing, and impact on inclusion of people of determination across Abu Dhabi, Dubai, and Sharjah
- Synthesized 10+ peer-reviewed sources from Google Scholar and Scopus to support findings and recommendations

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, HTML/CSS, Assembly

Developer Tools: Git, GitHub, VS Code, Eclipse, Google Colab, MATLAB, MySQL, Tomcat, Microsoft Power Apps, Power Automate

Libraries: pandas, NumPy, Matplotlib

3D Tools: Autodesk Maya

Other: Research Paper Writing, Technical Documentation

LANGUAGES

Malayalam: Native / Mother Tongue

English: Full Professional Proficiency

Hindi: Full Professional Proficiency

Urdu: Full Professional Proficiency

Arabic: Limited Working Proficiency
